

The concept of thematic restaurants and hotels are fast catching up in metros. Entrepreneurs are devising innovative ideas to create theme restaurants to woo food lovers.

Kochi too has been witnessing a new breed of consumers who prefer themed restaurants and hotels than to the run of the mill hang outs. Thematic restaurants are a welcome breather from regular restaurants and hotels as the unconventional surroundings of theme hotels are lending them a distinctive quality.

Every restaurant and hotel has the same thing to deliver; same food, same beverages, same music in the very same ambience. Consumers today are looking out for places that can give them one of a kind feeling or an out of the world experience. Certainly the ambience matters to a great deal as people come to unwind themselves and after all we want them to visit you frequently.

STILLLIFE is adept and known for creating surrealistic ambiances in hotels and restaurants. From rock memorabilia to sporting paraphernalia, from deep under water aquatic life to the tropical rain forests - such restaurants are a great choice for both fans of the chosen theme and anyone fancying a relaxed meal out in the city.

STILLIFE specializes in any scenery, be it a rain forest, underwater marine world, a den or the famed Ellora and Ajanta caves, the designs and details will be the exact replica and an elegant imitation of nature. Any of such ambiances are guaranteed to make the place simply beautiful and memorable. The STILLIFE team have been excellent in providing compelling designs and quality service and it has earned the goodwill of all customers'. And it has been the key point for STILLIFE's ongoing success. Our experts will guide you if you need any creative assistance that would best suit your space. STILLIFE's professional team have the know-how and infrastructure to visualize and weave a dream world under tight deadlines.

Collaborating with the art director and the design team, STILLIFE seamlessly integrates the necessary elements to enhance the key features, to highlight the details, to light up the characteristics, and to improve the overall richness. Every nook and corner is uniquely engineered by the specialized skills of our artists, crafts people and graphic designers. Partnership with engineers, architects and interior designers gives us the best construction and technical support.

Each of our details can give the look of completion to your restaurant or bar as well as a feel of serenity without the hassles of live plants. More and more people are switching to such themed ambience and people really are oblivious to surrounding because of high quality craftsmanship in the manufacturing process which makes them look more realistic than ever before. Our customers have discovered the effectiveness of these plants as opposed to the live ones and their continued support has been a source of great inspiration to us.

The advantages of artificial scenes, structure, props, plants and flowers are relatively maintenance-free when compared to natural ones, as there are no insects, no dust, termites or fungus to mar its freshness and this adds to the constant beauty, hygiene and cleanliness throughout the year. The major components of our structure basically comprise of cement and fibre. The plant props are created from silk, natural woods and a unique polythene blend to ensure highest levels of both beauty and durability. These are very cost effective and will give you value for money with absolutely no maintenance cost. We use special paints, fire resistant and non allergic materials to provide a safe and non toxic atmosphere.

• The advantages of artificial scenes, structure, props, plants and flowers are very cost effective and will give you value for money with absolutely no maintenance cost.

Sunil Maliyekal  
CHIEF SCULPTOR

Space constraint is another issue most of the entrepreneur's face today. But STILLLIFE has custom made solutions to them as well. Manually crafted specimen displaying beautiful artistic features can serve specific purpose. These artistic pieces, custom made props, paintings are some of the add ons that can change the entire look and feel of the place. We work wonders in little spaces too. On the other side, tall, large vacant spaces can give empty and a blank look. These can be a very big put down for the customers. A Jack's Beanstalk or a large tree could be the best option here. Without compromising on the freedom of movement and space, such spaces could be made picturesque thus providing a visual treat to the eyes of the customer.

STILLLIFE's master craftsman, Artist Sunil Maliyekal has worked in industry for the past 15 years and is proficient in creating sets of various ambiances, magnitude and moods. STILLLIFE's unique endeavour and novel concept is expected to create headlines and would be covered by various media including TV channels. The programme would include all the thematic ambiances created by him and this would indirectly be an additional media promo for your establishment. Some of his marvels can be seen at various places in South India. ■
